

Round r — where to collect

low-discrepancy (Sobol) coverage

train +
deploy

Deploy → outcomes

rollouts reveal a hard region

promote
+ fill

Round r+1 — chosen from evidence

failures promoted + weighted fill

collect,
retrain,
repeat

After a few rounds

the hard set shrinks

● Sobol initial state

● success

✗ failure

○ hardness-weighted fill

⊗ counterfactual demo at failed state

● estimated hard region
